**Exclusions: Note - Please be sure you understand these exclusions!**

The following items are specifically excluded from this quotation, as inclement weather, varying site conditions and location of tip sites affect the final cost, which cannot be - and are not - anticipated by Cascade Pools: (WITHOUT PREJUDICE)

1. Building Approvals & other Council Fees are payable to Council by you. Some Councils require a PS4 (Construction Review by the Structural Engineer) which will be an additional proceThe cost of processing application forms, production of a Site Plan, and the provision of MH Design Ltd's Engineering Specifications and Drawings for a Cascade specific pool (a \$750.00 value) is included in the quotation. These plans cannot be used for another pool type or changed in any way.
2. Excavation & Removal of soil from the site by truck or earth-moving machinery or away from the site where the pool is being installed, including moving about on the property is YOUR CARE. Trucking soil usually involves eight or more hours of hireage, and BAD TRAFFIC can add hours to the bill. Tips Fees may be payable, adding \$500 - \$1,500. Allow at least \$3,500 per day for soil disposal. NOTE: Damage to driveways etc. is NOT COVERED by Cascade's insurance, and probably NOT COVERED by the trucking company either! Check with your Insurance Broker to see if you need one or two days cover when the excavation takes place!
3. Electrical connections to filter plant, ozonator, chlorinator, lights-to-transformers/extra wire, transformers, or other associated electrical equipment are YOUR CARE. Allow \$3000 for this. You need a waterproof three-pin wall outlet for the pool filter, and a 15 amp line for a 2.4 Kw (input) Heat Pump. Pool lights come with a transformer for each unit (Power Supply Authority regulations)
4. Tanker fill water or where a Fire Hydrant supply is not available. Get a local quote (ask us for your pool's water capacity). If you use your own rainwater tanks or bore to fill the pool, there will be a crew standby charge of \$650.00 per day (+GST where applicable) while the pool fills slowly. Any equipment on hire may also be affected by the delay and may be charged to your account.
5. Compliance Deposit - May vary from \$500 to \$1000 depending on Council (refundable after final inspection), Resource Consents, Geotechnical or PS4 Engineer's Reports, or any other Council requirements are excluded from this quotation unless noted.
6. "Undiscovered Country" - underground obstacle encountered during excavation, even though anticipated or discussed with us prior to excavation, infill or buildup of the excavation, perphipheral damage to adjoining structures, retaining or shoring as required as a result will be an extra, even though anticipated or included (or not included) in Schedule B.
7. Pool Fencing: Required under the Fencing of Swimming Pools Act 1987, and which must be in place prior to filling the swimming pool. If you want us to arrange temporary fencing for you, you will be billed direct by the supplier.

**WHICHEVER POOL COMPANY YOU CHOOSE, THESE EXTRA COSTS WILL APPLY! THEY ARE NOT INCLUDED IN THE BASIC POOL PRICE!**

**THESE ARE ESTIMATES BASED ON OUR EXPERIENCE, AND NOT A QUOTE BY CASCADE!**
